TELESCOPIC RIFLE SIGHTS

We have a few more of the famous No. 32 Mk. I rifle sights as used on the .303 by snipers. They are 11 ins. long and weigh 1½ lbs. Diameter 1 in. to 1½ ins. Power 3x. Eye relief 3 ins. All distance focus over 10 yds. Fitted with calibrated click-stop adjustment of the internal cross-line and pointer graticule for elevation and windage. These 'scopes are, of course, ex-Government and slightly used but are guaranteed optically and mechanically sound. No mounts are supplied as they vary according to the type of rifle, but your local gunsmith will fit them for you for a nominal sum. Suitable for .22 rifles, and 90 per cent. of our customers are using them for this purpose with every satisfaction and a worth-while saving in cost as similar sights are unobtainable elsewhere under £20 each. Our price for these really superb instruments is
